{reliably different}

Providing a professional,  
courteous & reliable  
service for businesses  
close to all our hearts

At SWS, we can provide **free bins** for your care or nursing home to safely store every type of waste you produce. Simply select the type, size, and number of bins you need, and we'll deliver them to your care home anywhere in the UK. You just have to arrange and pay for collection. This can be on a daily, weekly, or fortnightly schedule – depending on the size of your care home and amount of waste you need removing. We appreciate every nursing home is different and offer flexible terms, so you can get different bins collected at different times. Our licensed waste carriers will pick up your bins, bags, and containers from an accessible point at an agreed time. They'll then transport to a nearby waste disposal and recycling facility for safe and efficient disposal – avoiding landfill wherever possible. We can tailor our care home waste management services to suit your business.
