## SWS is a very different kind of waste company.

At SWS we are able to provide a closed loop recycling solution which manages the process of disposing of your toner cartridges and WEEE waste from start to finish in a compliant, environmentally sound manner.

Where cartridges can no longer be refilled, or in the case of copies or remanufactured cartridges, the question arises of what to do with the spent cases?

Classified as hazardous chemical waste, it's illegal for these waste toner cartridges to be dumped in landfill sites, which is why it's important to find a responsible way for your business to dispose of used toner cartridges and ensure you're compliant with current legislation.

Nationwide collection service

Disposal solutions for compatible and re-manufactured cartridges

Guaranteed quick and simple payment options

Ethical disposal of used printer consumables in conjunction with WEEE compliance
